# Windshield Repair & Replacement

**Protect Your Purchase**

## A small chip in a windshield can quickly become a big problem.

## Windshield repair can save money—and help avoid time and hassle.

Windshield Repair is a permanent process that removes air from the break and fills it with a curable resin. Small cracks, stars or chips up to 6" in length on the front windshield caused by road hazards, that are repairable through an existing Windshield Repair process, are all covered. This process bonds the glass together and restores strength to the windshield while improving the break's appearance and usually prevents the break from spreading. **If the windshield is not repairable, it will be replaced.**

## Windshield Repair & Replacement Benefits

- A trained technician will repair your damaged windshield, or if not repairable, will replace it
- Windshield replacement can be expensive
