

What To Do If You've Had An Accident

Safety First

- Call 911 if you or any passengers are injured and follow the dispatcher's instructions.
- If your vehicle is not creating a hazard or blocking traffic, leave it where it is. Turn off your engine, turn on your hazard lights and set up flares to alert other drivers. If your vehicle is causing a hazard and is safe to drive, move it to the side of the road.
- If it is safe to do so, get yourself and your passengers to a safe area off the road clear of any hazard.
- You should report your accident to the police in most instances, including when there are injuries, there is significant vehicle damage, or any damage to public property. Check with the police if uncertain.

Information Exchange

- The following information should be exchanged between all involved drivers: names of the insured (and the driver, if different), insurance company, policy number, agent name and phone number, vehicle make, model, year, color and VIN.
- Get a copy of the police report if one is filed and the name and badge number of the officer filing the report.
- Get the names and contact information for any witnesses including passengers in the other vehicles.
- If your vehicle needs to be towed call the Body By Cochran 24-Hour Towing Hotline: **855.750.2639**

Documenting the Accident

If it is safe to do so, take photos of the following:

- Position of vehicles involved
- License plates
- Damage to all vehicles
- Damage to property
- Street signs and landmarks to identify the location
- All visible elements relevant to the accident

Starting the Repair Process
