MERCEDES-BENZ
METRIS WAV

Adding Accessibility and Sophistication to Your Fleet

Driverge's Metris Wheelchair Accessible Van (WAV) is designed to meet the needs of businesses and individuals requiring the space and flexibility that only the Metris can deliver. A combination of style and innovative engineering, the Metris WAV provides an efficient, ADA compliant, multi-function vehicle that's perfect for transporting wheelchair passengers and able-bodied riders. Rear securement retractors provide an efficient, easy-to-use, 4-point tie-down system.

Electronic Wheelchair Assist & Easypull System

The Metris WAV comes equipped with an automatic tensioning system that assists with loading and unloading a wheelchair passenger. Our optional 'Easypull' winch system is also available to pull the wheelchair and passenger up the ramp in to the vehicle.

Rear securement retractors are efficient and easy-to-use in securing the wheelchair and passenger.

Top: ramp in flat cargo position with third row seats stowed.

Middle: third row seats deployed.

Bottom: ramp in vertical position when vehicle is being used with wheelchair passenger.
